BD-P1200 Blu-ray Disc Player – Enjoy the HIGHEST DEFINITION

More capacity, more versatility!

Current dual layer Blu-ray discs can hold up to 50GB. That's over 4 hours of HDTV programs, or up to 26 hours of standard definition TV. And thanks to the structure of Blu-ray discs, capacity is likely to increase two-fold in the future.

Complete Backwards Playback compatibility

In addition to playing high-definition BD discs, Samsung Blu-ray technology offers complete backward compatibility. You can still enjoy your current favorite CDs and DVDs, no matter the format. In fact, they look and sound better than ever before, because the BD-P1000 can take your current DVD library and upconvert it to a near high-definition experience via 720p/1080i and 1080p.

Hi-Definition BD/DVD/CD Playback

Samsung's BD-P1000 delivers hi-definition picture quality to HDTV with HDMI™ connection.

CD & DVD Compatible

Samsung's Blu-ray Disc Player offers state of the art viewing with full CD and DVD playback compatibility.
