

HD-A20

HD DVD PLAYER

The HD-A20 takes the performance and convenience of HD DVD to the next level. For the highest level of picture quality with today's best performing high definition TVs, the HD-A20 adds 1080p output. That's twice the resolution of a 720p signal.

ADVANTAGE TOSHIBA

High definition playback delivers 720p/1080i/1080p resolution, up to six times the resolution of DVD*. Using leading-edge efficient video compression standards makes it possible to experience the full potential of your HDTV.

Advanced audio, including Dolby® TrueHD, Dolby® Digital Plus and DTS® HD (core only), along with legacy formats including Dolby® Digital and DTS® bring an increased sonic realism to movie soundtracks.

Backwards compatibility means you can enjoy your existing library of DVDs and CDs, and through the process of upconversion and output through HDMI, your movies are scaled to match the resolution of your HD display.

An interface suite includes an abundance of audio/video connections as well as an ethernet connection so that your HD DVD player can be updated to support future applications and services.

HD-A20

SPECIFICATIONS

Video

HD Output	720p/1080i/1080p
SD Upconversion	480p/720p/1080i/1080p

Product & Packaging

Dimensions (WHD)	16.9" x 2.58" x 13.58"
UPC	022265000243

IMPORTANT NOTES

HD DVD with high-definition content required for HD output. Viewing high-definition content and up-converting DVD content may require an HDCP capable DVI or HDMI input on your display device. Firmware update may be required for some interactive features depending on content, which may also require an always-on broadband internet connection. Some features may require additional bandwidth. Some recordable media may not be supported. Dolby Digital Plus, Dolby TrueHD and DTS support for up to 5.1 channels (DTS HD support for DTS core only). MP3/WMA audio files not supported. Some current DVDs and CDs may not be compatible. HDMI audio support for PCM only. Because HD DVD is a new format that makes use of new technologies, certain disc, digital connection and other compatibility and/or performance issues are possible. This may, in rare cases, include disc freezing while accessing certain disc features or functions, or certain parts of the disc not playing back or operating as fully intended. If you experience such issues, please refer to the FAQ sections of www.toshibahddvd.com or www.tacp.toshiba.com for information on possible work-around solutions or the availability of firmware updates that may resolve your problem, or contact Toshiba Customer Solutions. Some features subject to delayed availability. 1080p capable display required for 1080p output resolution. *Resolution comparison based on 480i vs. 1080i pixel counts
